

QUICK REFERENCE SHEET

Storage, Throughput, and Download Time Cheat Sheet

A printable guide to storage units, throughput, transfer-time maths, and RAID-capacity thinking, written to keep bits, bytes, and usable capacity straight.

QUICK OVERVIEW

Category: computing networking

Includes 1 related guide page.

Links back to 4 calculator tools.

FORMULA HIGHLIGHTS

Throughput
throughput = data / time

Download time
time = file size / rate

WHAT IS INSIDE

- Bit and byte reminders for transfer work.
- RAID-capacity prompts and basic overhead cautions.
- Short transfer-time and throughput formulas in one place.

BEST USE

Useful for system planning, file-transfer estimates, and quick infrastructure calculations.
